

## EDUCATION

### IIT Roorkee

**B.Tech in Electronics and Communication Engineering**  
Minor Specialization in Computer Science  
CGPA - 8.85  
Batch of 2020

## SKILLS

### Languages

• Java • C++ • JavaScript • Ruby  
• Python • HTML • CSS • Bash • Go

### Technologies

• Git • Linux • Kubernetes • Docker  
• Springboot • Gradle • JBoss  
• Kafka Streams • React • Redux  
• Laravel • Ruby on Rails • Vim

## COURSEWORK

### Undergraduate

• Computer Networks  
• Object Oriented Programming  
• Operating Systems  
• Database Management Systems  
• Data Structures

## ACTIVITIES

### Google Code-in

Winter - 2019

• As Org Admin, helped high school students complete 180+ open source items at [CircuitVerse.org](https://circuitverse.org)

### Microsoft Code.Fun.Do

2018

• Created a presence detection application to automate employee attendance. The team stood among the top three at IIT Roorkee.

### Watch Out

Sept 2016 - Sept 2019

• Web Developer at the official campus magazine.

### Joint Entrance Examination

2016

• AIR 1061 in JEE Advance and 1119 in JEE Main.

### KVPY Scholarship

2015

• Recipient of the prestigious KVPY Scholarship by the Government of India with AIR 811

## EXPERIENCE

### Cisco | Software Engineer II

Aug 2020 - Present | Bangalore, India

- Working on JBoss-based Field Network Director to handle onboarding of proprietary devices on management software.
- With DNA Spaces team, handled processing of location telemetry on Kafka Streams. Engineered unit testing framework and increased coverage to 80%.
- Collaborated with DNA Center team to implement a multi-vendor JAX-RS backend to ease placing orders for 5G capable SIMs.

### Intuit | Software Engineer Intern

Summer - 2019 | Bangalore, India

- Teamed up with QuickBooks Online group to develop a Springboot application to detect rule-based data inconsistency points between resources.
- The application was developed in a way to scale across resources and rules.
- The tool significantly reduced debugging effort and turn around time.

### Google Summer of Code 2019 | CircuitVerse.org

May 2019 - Sept 2019 | Remote (Link)

- Secured a coveted spot in GSoC, a highly competitive program with an acceptance rate of less than 20%, to contribute to open source projects.
- Successfully delivered and implemented 15 innovative features with CircuitVerse, a student platform boasting 25000 users at the time.

### Atlan | DevOps Intern

Winter - 2019 | Delhi, India

- Integrated exporters with K8s monitoring tools - Prometheus and Grafana, using Helm.
- Authored Bash automation scripts for taking log backups on AWS S3.

### Flyhomes | Software Engineer Intern

Summer & Winter - 2018 | Noida (Link)

- A start-up providing real estate solutions in Seattle, USA.
- Wrote integration tests to improve the overall test coverage of API.
- Worked on Ruby on Rails API, React-Redux UI to implement end-user features.

## PROJECTS

### CodeVillage | SDSLabs, IIT Roorkee

May 2017 - May 2020 (Link)

- An online sports programming platform with its own judge, holds regular competitions with international participation.
- Developed an admin-panel in Lumen MVC-framework having application of Redis queues, to aid problem and competition management.

### Accounts | SDSLabs, IIT Roorkee

May 2019 - May 2020

- OAuth 2.0 application for SDSLabs which supports both client credentials and auth code based flows.

## LEADERSHIP

### Software Developer | SDSLabs, IIT Roorkee

Jan 2017 – May 2020

- Involved in maintaining and developing applications for campus students as well as open to the internet.
- Regularly conducted hackathons, public lectures, and competitions to foster the technical culture in campus.
